LANGUAGES

Frontend

ReactJs, Typescript, NextJs, RemixJs, TailwindCSS, MantineUI, Redux, Tanstack Query

Backend

NodeJs, ExpressJs, NestJs

Database

Postgres, Sqlite, Prisma(SQL)

Production Project Experiences on -

Digital Banking Live Status (Project Timeline 4 weeks)

This project is mainly about controlling data in real-time while more than one user is using the website on different devices. The main algorithm exists in how we do when every admin is adding tasks simultaneously and changing the real-time data as soon as the changes happen and showing it to the user.

There are three main requirements changes in this project within 3 Weeks

According to the changes of business requirements, we change tech stack for three times

First Tech stack => Vite, Serverless(Lambda) with AWS s3

Second Tech stack => Vite, Express with SQLite

Third Tech stack => Remix Serverless with Prisma and SQLite

Production Project Experiences on -

Socialmedia Clone with layout and design from Facebook UI

This project is to learn about the complex structure, the project contain an e-commerce page within a social media page like Facebook. This project taught me about when to use global state and when not to because when the project grows, how we design the structure and the choice of tech stack come to an important role when we make a mistake from the start of project it is difficult to change the structure later.

Tech Stack => ReactJs, Tailwind, useContext , Redux Toolkit, ...

There are a lot of features within the project like ecommerce hover animation and creating posts and giving like and accepting or rejecting friends,...

Test it here =>

Project Link - <https://socialmedia-by-shp.netlify.app/>

Github Repo Link - <https://github.com/SaiHlyanPhyoe7/react-tailwind-social-media>

Customer Relation Management (CRM Web)

This project is to learn about the complex system of the CRM. It contain authentication and authorization. Handle a lot of form and adding customer and viewing customer are present. Filtering with name, letter and start date and end date . Pagination and adding the new admin and adding new user are contain as the every CRM app needed.

Tech Stack => ReactJs, CSS , Redux Toolkit, Firebase ...

There are a lot of features within the project like route guarding and others,...

The project can be tested and view on the below link the.

Sign-in username => sai@gmail.com

Sign-in password => sai@123

Test it here =>

Project Link - <https://assignment-k.netlify.app/>

Github Repo Link - <https://github.com/SaiHlyanPhyoe7/AssignmentK>

There are still a lot of project like

Creating Article with User Relation

Tech stack => NestJS, PostgreSQL, Swagger and Prisma

Portfolio with lots of animation

Tech stack => NextJs, Typescript, MantineUI, Framer Motion, Parallax Effect

Cryptocurrency Exchange

Tech stack => NextJs, ChartJs, Swiper and RapidAPI, RTK Query

All of my projects can be found here on my portfolio project page

Cover Letter

As a Full Stack Developer with experience in frontend development using React, Next.js, and Remix.js, and backend development using Nest.js, I have developed a keen eye for detail and a deep appreciation for creating robust and user-friendly web applications. My proficiency in database management using Postgres and Prisma(SQL) has allowed me to build reliable and scalable systems that meet the unique needs of my clients.

What truly sets me apart is my passion for innovation and creativity. I am always looking for new and unique ways to solve complex problems, and I thrive in environments that offer new challenges. I have a proven track record of developing innovative solutions that exceed user expectations, and I am confident that I can bring this same level of creativity and expertise to your team.

As a team player, I enjoy collaborating with other developers, designers, and stakeholders to deliver high-quality projects that are completed on time and within budget. I take pride in my ability to communicate effectively with both technical and non-technical stakeholders, and I am committed to building strong relationships that enable me to deliver exceptional results.

I am excited about the opportunity to bring my skills, experience, and passion to your team. I am confident that my ability to develop robust and innovative solutions, combined with my attention to detail and strong work ethic, make me a valuable asset to your organization. Thank you for considering my application, and I look forward to the opportunity to discuss my qualifications further.

Sincerely,
Sai Hlyan Phyoe
